

Smart air control for industry.

- Drying
- Cleaning
- Cooling
- Separating
- Vacuum
- Blowing

GREEN BLOW[®]

What is GreenBlow?

A simple blast of air,
endless possibilities.

GreenBlow is a modular air-treatment system engineered to optimize industrial processes.

By combining blowers, air blades and modular components, it delivers tailor-made solutions for your needs.

Ideal for:

- Drying
- Cleaning
- Cooling
- Separating
- Vacuum
- Blowing

Why choose it?

More performance,
less energy.

A complete and flexible system:
Create your own drying system using all the components included in the line.

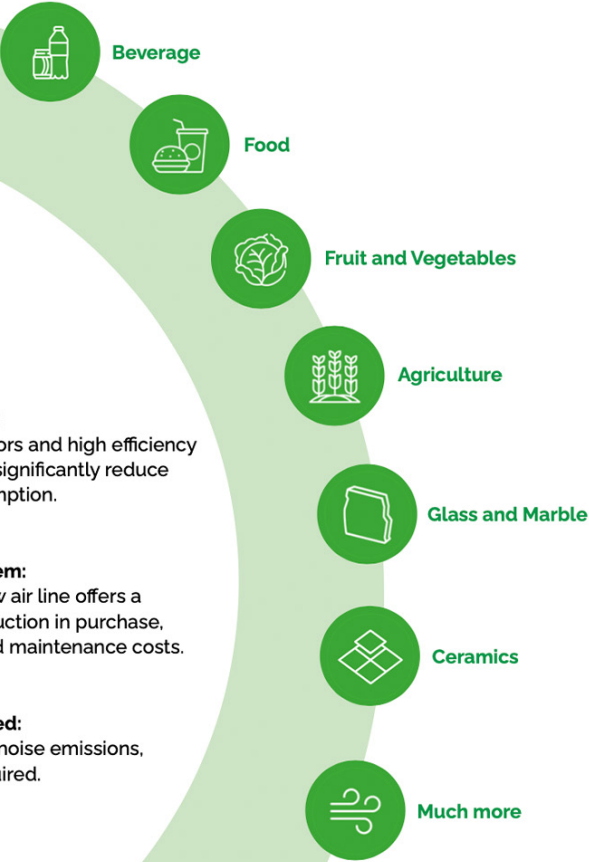

Compact size:
A complete drying system takes up little space, even on existing lines.

Clean air:
Filters purify the air, capturing dust and small particles.

Energy saving:
The small motors and high efficiency of the system significantly reduce energy consumption.

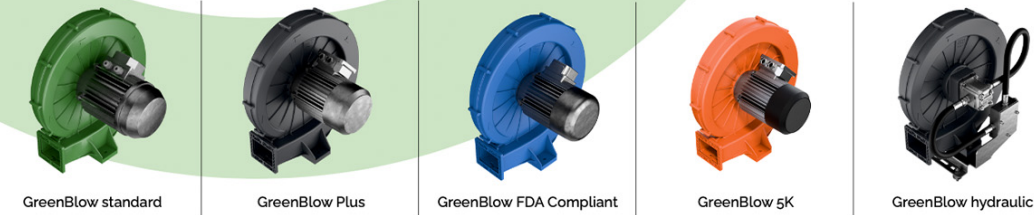

Low Cost system:
The GreenBlow air line offers a significant reduction in purchase, installation and maintenance costs.

No PPE required:
Thanks to low noise emissions, PPE is not required.

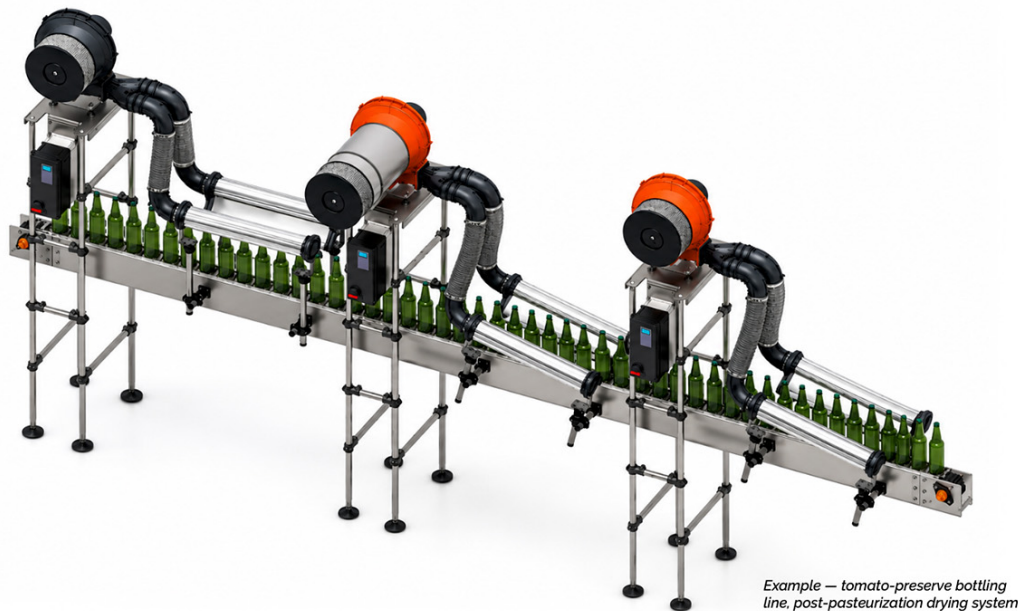

A complete product line

Blowers

Other accessories

Application flexibility

Different solutions for a wide range of industries

Solutions for a wide range of industries: food (bulk food processing and drying of glass, can and plastic packaging...), beverage (bottling), packaging, agriculture (foliage blow-off), coating (pre-paint blow-off, post-paint drying) and much more.

Blowing

Pre/post-treatment surface cleaning (dust, blasting residue...). Separation of materials by weight or shape (leaves, debris, sand...).

Cooling

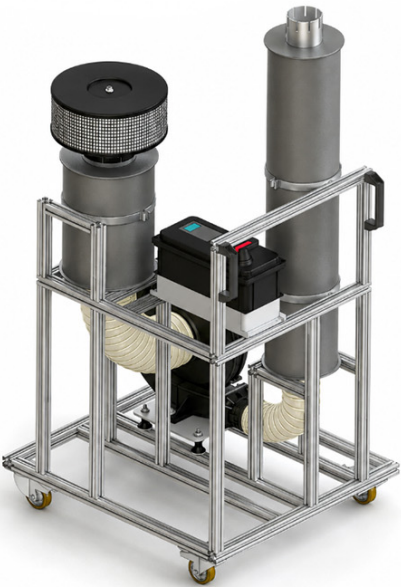

Arranged in banks, units enable low-cost cooling.

Drying

Removal of washing, cleaning or process residues (water/oils/solvents).

Vacuum

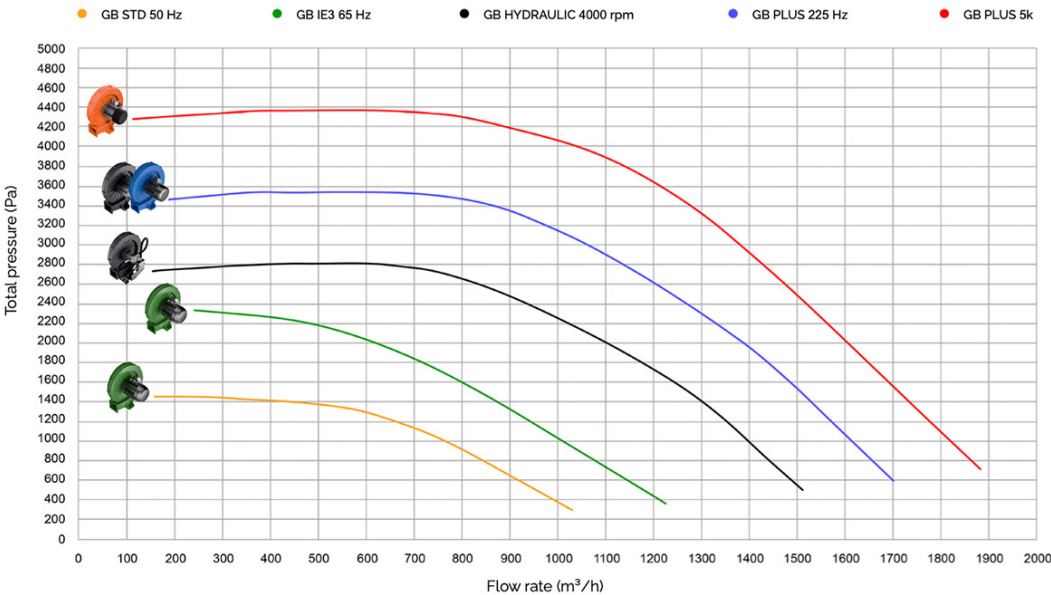

Removal of granular material and dust during cleaning operations. Material can be reclaimed via the cyclone separator (e.g. valuable metal dust...).

Compact mobile GreenBlow station with silencer and filter

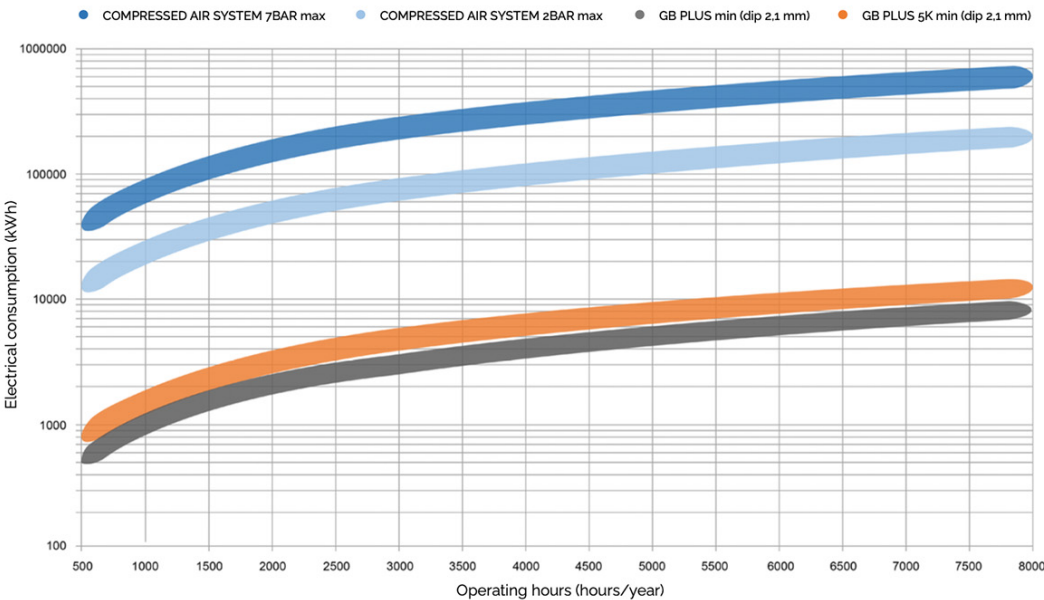

The right airflow for every application

The GreenBlow range offers multiple flow-rate levels to suit every application. For even higher performance, two GreenBlow units can be installed in series.

Less energy, more savings

GreenBlow significantly reduces energy consumption compared with traditional compressed-air systems, delivering substantial savings on operating costs.
